

World TB Day March 2019

It's Time

It's time It's time

To end TB

It's time It's time

For the honest service

Do not take the TB

As global health crisis

It's the scene It's the scene

Preventing the spread of TB.

Cough phlegm fever fatigue

Loss of weight and poor appetite

Cough out of blood are

Alerting signs of TB

It is so rush to Sputum

Go for Microscopic test, Gene x pert test

Chest X Ray and Mantoux test today itself.

It you have symptoms of TB
Do not hesitate to investigate
Evening Fever, Cough, weight loss and Appetite loss
And cough out blood are
Presumptive index for TB
Be preserve the social care
With oblige for bright future.

Say that medication for Six months
Will cure the patient
So be alert today
And live without the Stigma of TB
Bridge it and bridge it
With multispectral approach
Voice it and Voice it
For TB care Health actions.

Rhythm it and Rhythm it
For World without TB disease
It is the time It is the time
For the elimination of Childhood TB.

Establish timely People
Friendly Health care on Earth
Do not interrupt the treatment
On halfway since it will be a disaster
Exit the TB in the World which
Exist for along time by our scarification
Hence your honest Co Operation
Shall help to Zero the TB illness.
